

010601 Loft Angle Gauge with 2 1/2 inch radius

This 2½ inch protractor is an essential accessory for all lie and loft measuring gauges. The larger scale improves readability and is better suited for today's larger clubheads, especially drivers. Measures from 0°~90° with a resolution of 0.5 degree.

▲ Loft angle as measured on irons

▲ Loft angle on woods is measured at half the club face height.
