

GOLF MECHANIX® 110221

Metered Grip Tape Dispenser with Dual Spool

This dual purpose, cost saving grip tape dispenser features both the metered grip tape dispensing capability of the base model and a second spool for dispensing build up tape, eliminating the need for a second grip tape dispenser.

How it works

- Set cog to the desired tape length
- Pull tape until the gears lock.
- Pull tape down over blade to tear.
- The drive resets itself for the next run.
