

Professional Grip Knife

The best of the best utility knife for removing old grips, plastic collars, etc. The compound configuration positions the hand at the correct angle over the work. This allows firm and precise control of the blade while cutting, especially when pushing away from the body to prevent injury.

This utility knife also features a blade safety catch and lock switch, with a spare blade holder in the handle. One hooked and one straight blade are included in the kit.

Additional blades sold separately.
