

## **110851-UA** Air Gripper & Grip remover

The Air Gripper is designed to help you quickly install and safely un-install grips. It features a transparent, removable, blow-out prevention tube with machined ridges for better handling. Original grips can be removed and preserved for re-installation without damage. The kit now comes complete with two grip removal tubes. One for standard grip sizes and the other for oversized putter grips. The kit also includes the spring coiled hose, duster and a universal quick coupler. This products requires the use of a stationary air compressor.

▲ Two size blow out preventer's are included in the kit

## **170206** Gripping Vise Clamp

Safely clamps any golf shaft for gripping. Thumb knob quickly and easily adjusts the clamp pressure for use with light weight graphite shafts. Comes with a bench mount bracket that can be removed, rotated 90 degrees and reinstalled for use in a vise.

▲ Quick vise clamp with round jaws does a good job at securing shafts at or near the butt end of the shaft, like when gripping.

▲ Vise can be bolted on top of a bench or held in a bench vise. Reversible bracket allow a lot of flexibility creating the ideal setup
