

"The Valiant" Lie and Loft Bending Gauge

In terms of bending accuracy, clamping power, speed and versatility; *The Valiant* is the best compact, entry-level Lie & Loft bending gauge on the market that is capable of bending irons and wedges straight out of the box.

Precision machined frame fitted with re-circulating linear ball bearings mounted over low friction guide rods ensure a smooth and trouble free operation. The capability of this design can be further upgraded to bend hybrids and soft forged irons if so desired.

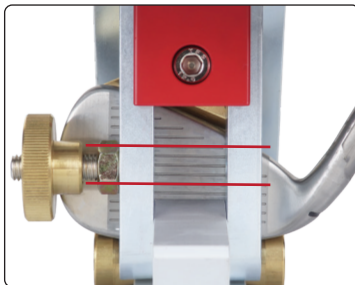

▲ High visibility direct reading full scale lie and loft protractor with a resolution of better than 1°

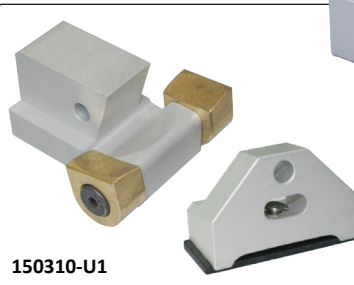

▲ Triangulated high stability isostatic clamping arrangement with conical soling rollers support sole at both ends to secure iron in position.

Key Features:

- Self squaring frame and protractor assembly
- Consistent, readings accurate to within 1° or less.
- Works on all type of irons and wedges
- Works on right or left-handed clubs
- Mounts on workbench or stand.
- Large selection of optional accessories
- Can be mounted on all 1507xx Stands

▲ Toe Stop prevents slippage when iron is positioned and secured in the gauge. Slot provides clear sighting of grooves to aid in locating the iron in the correct lie position.
