

Heavy Duty 360° turn table

150705 30025867

This Heavy Duty turn table let clubmakers gain complete control over the position of a bending gauge, instead of working around it! Improves accuracy, adds control, saves time and eliminates fatigue when having to work through a whole set of irons. Quickly switches between left & right-handed clubs.

Heavy-gauge steel construction and fitted with two quill lock handles. Swivel base bolts onto all our 1507XX bending stands and heavy duty work benches.

Compact Heavy Duty Stand

150710

Unlike other stands designed with a single tubular pillar, the Golfmechanix Compact Heavy Duty Stand features a rigid structure with a wide stance, that transfers power progressively and efficiently to the hosel. A bending bar tray enhances functionality and adds stability to the setup.

*accepts most 15 series bending gauges
**Must be bolted to the floor (bolts included)

Portable Heavy Duty Bending Stand

150760 30025866

The Golfmechanix Portable Heavy Duty Bending Stand is free standing unit can be moved around the workshop as needed. Since it only requires the club-maker to leverage the bending effort by standing on the platform, this unit does not need to be bolted to the floor.

*Hat clamps & anchor bolts are provided for fixing the stand permanently to shop floor if so desired.

All Golfmechanix bending stands and 360 swivel bases are compatible with all our lie and loft bending gauges with the exclusion of our 151XX and 152XX series.
