Quick Shaft Clamp

Safely clamps any golf shaft for gripping. Thumb knob quickly and easily adjusts the clamping pressure for use with light weight graphite shafts. Comes with a bench mount bracket that can be removed, rotated 90 degrees and reinstalled for use in a vise.

▲ Quick vise clamp with round jaws does a good job at securing shafts at or near the butt end of the shaft, like when gripping.

▲ Vise can be bolted on top of a bench or held in a bench vise. Reversible bracket allow a lot of flexibility creating the ideal setup

▲ Re-gripping pan mounts right under the vise and at the edge of the bench. Slotted bracket is easy to unhook when pan is not used.
