

210240 *Shaft Extractor Ferrule Splitter*

The shaft Extractor Ferrule Splitter is made of hardened steel. A great time-saving device when working with any of the 210xxx-series shaft extractors. Rides on Steel and graphite shafts with a tip Od of .335 ~.410

▲ The ferrule splitter is produced from hardened steel to endure wear and tear. Treat the cutting surface as you would any cutting instrument to keep its edge sharp.
